Improve Health

Protect Assets

Enhance Comfort

Reduce Furnace Energy Costs

A Whole-House Humidifier:

- Treats Your Whole House 24 / 7 / 365
- Requires Minimal Maintenance
- Is Out of Sight
- Runs Quietly

Winter months mean drier indoor air.

When the air in your home is too dry, you know how unpleasant it can be.

Health concerns

The right humidity levels keep your sinuses and throat healthy, reducing the incidents of cold, flu, respiratory infections, allergies, asthma, and bloody noses. Studies show that humidity that's too low contributes to the flu virus surviving longer, while simultaneously increasing its ability to spread from one person to another.

Dry, itchy, cracked skin

Dry air causes your skin to dry as well, and left untreated can cause anything from minor discomfort to cracked, bleeding skin.

Temperature discomfort

Dry air causes air to feel cooler than it really is, leading you to turn up the thermostat. The result is even drier air and a higher heating bill. Adding humidity saves money.

Damage to your home and assets

Dry air pulls moisture from your home's wood framing, trim, flooring, and furniture. Expensive artwork and musical instruments can become damaged. Dry air causes gaps between ceilings and walls, letting in cold winter air and increasing the cost of your heating bill.

Static shock

When the air is too dry, static electricity begins to build up. This can cause blankets and clothes to stick together and, more importantly, cause painful electric shocks when you touch a doorknob or another metal surface. Static shocks can damage expensive electronics.

**- Air that's too dry hurts
your health, your comfort,
your home, *and* your
pocketbook.**

GeneralAire® Has Your Solution

Maintain the right humidity throughout your entire home with the new **GeneralAire® 4400A Fan-Assist Evaporative Humidifier Model** to protect your home and its contents, while also offering you and your family greater health and comfort.

The Benefits

- Requires Minimal maintenance.
- Treats the entire home.
- Offers maximum humidity output.

GeneralAire® 4400A Fan-Assist Evaporative Humidifier Features:

- Quiet Cross-Flow Fan, Low Decibel Sound compared to Axial Fan
- “½” Push-On Valve with Shutoff in Place of Saddle Valve
- Innovative, Space-Saving Design
- Enhanced Output Through:
 - Low-Profile Cover Forces Air Through Vapor Pad at it's Warmest Point
- Easy & Quick Vapor Pad® Replacement Through:
 - Snap-in-Place, Easy-Lift-Off Cover
 - Hinged Door
 - Sturdy “Pull Apart” Two-Piece Vapor Pad® Frame
- UV Stable Cover
- Built-In Transformer
- A Safety Switch That Removes Power When the Door Is Opened
- Easy and Seamless Installation
- GFX4 Automatic Digital Humidistat - Included With **ALL** Models
 - Controls the Furnace Blower Motor
- Accommodates Up to 4400 Square Feet

A Comparative Look at the GF4400A

CROSS FLOW FAN

The 4400A uses a very quiet cross-flow fan rated at 48dB, a 25% reduction in noise versus the rotary blade 1000 model rated at 72Db.

DOOR DESIGN

The new door design with hinges that allow door to swing open for complete and easy access to service the vapor pad, whereas the 1000 was more challenging with its lift-up-and off hinged cover style mechanism.

COVERAGE

A 19GPD product that humidifies up to 4400sq ft versus the 1000 model at 18GPD and capacity to humidify up to 3000sq ft.

WEIGHT & DIMENSIONS

New 4400A weighs only 12lbs, a 20% weight reduction compared with the previous 1000 model version at 15lbs. The depth of the new 4400A at 6.5inches is a 33% reduction compared with the 10.5in depth of the 1000 model.

The GFX4 Digital Humidistat is included in every GF4400A carton.
